Unlike most studies, which assume that the 'rise of the West' is the story of the coming of the modern world, this history, drawing upon new scholarship on Asia, Africa, and the New World, constructs a story in which those parts of the world play major roles. Robert Marks defines the modern world as one marked by industry, the nation state, interstate warfare, a large and growing gap between the wealthiest and poorest parts of the world, and an escape from 'the biological old regime.'
